CACAU

DESIGNED BY
ESTÚDIO UULTIS

CACAU

The Cacau dining table incorporates, through its curves and details, the strength and elegance of one of the earth's most precious treasures: cocoa. Its base, reminiscent of the seed of the fruit, captures the essence of nature in its most refined form, evoking a feeling of indulgence and sophistication, like an invitation to collect memorable moments.

STRUCTURE

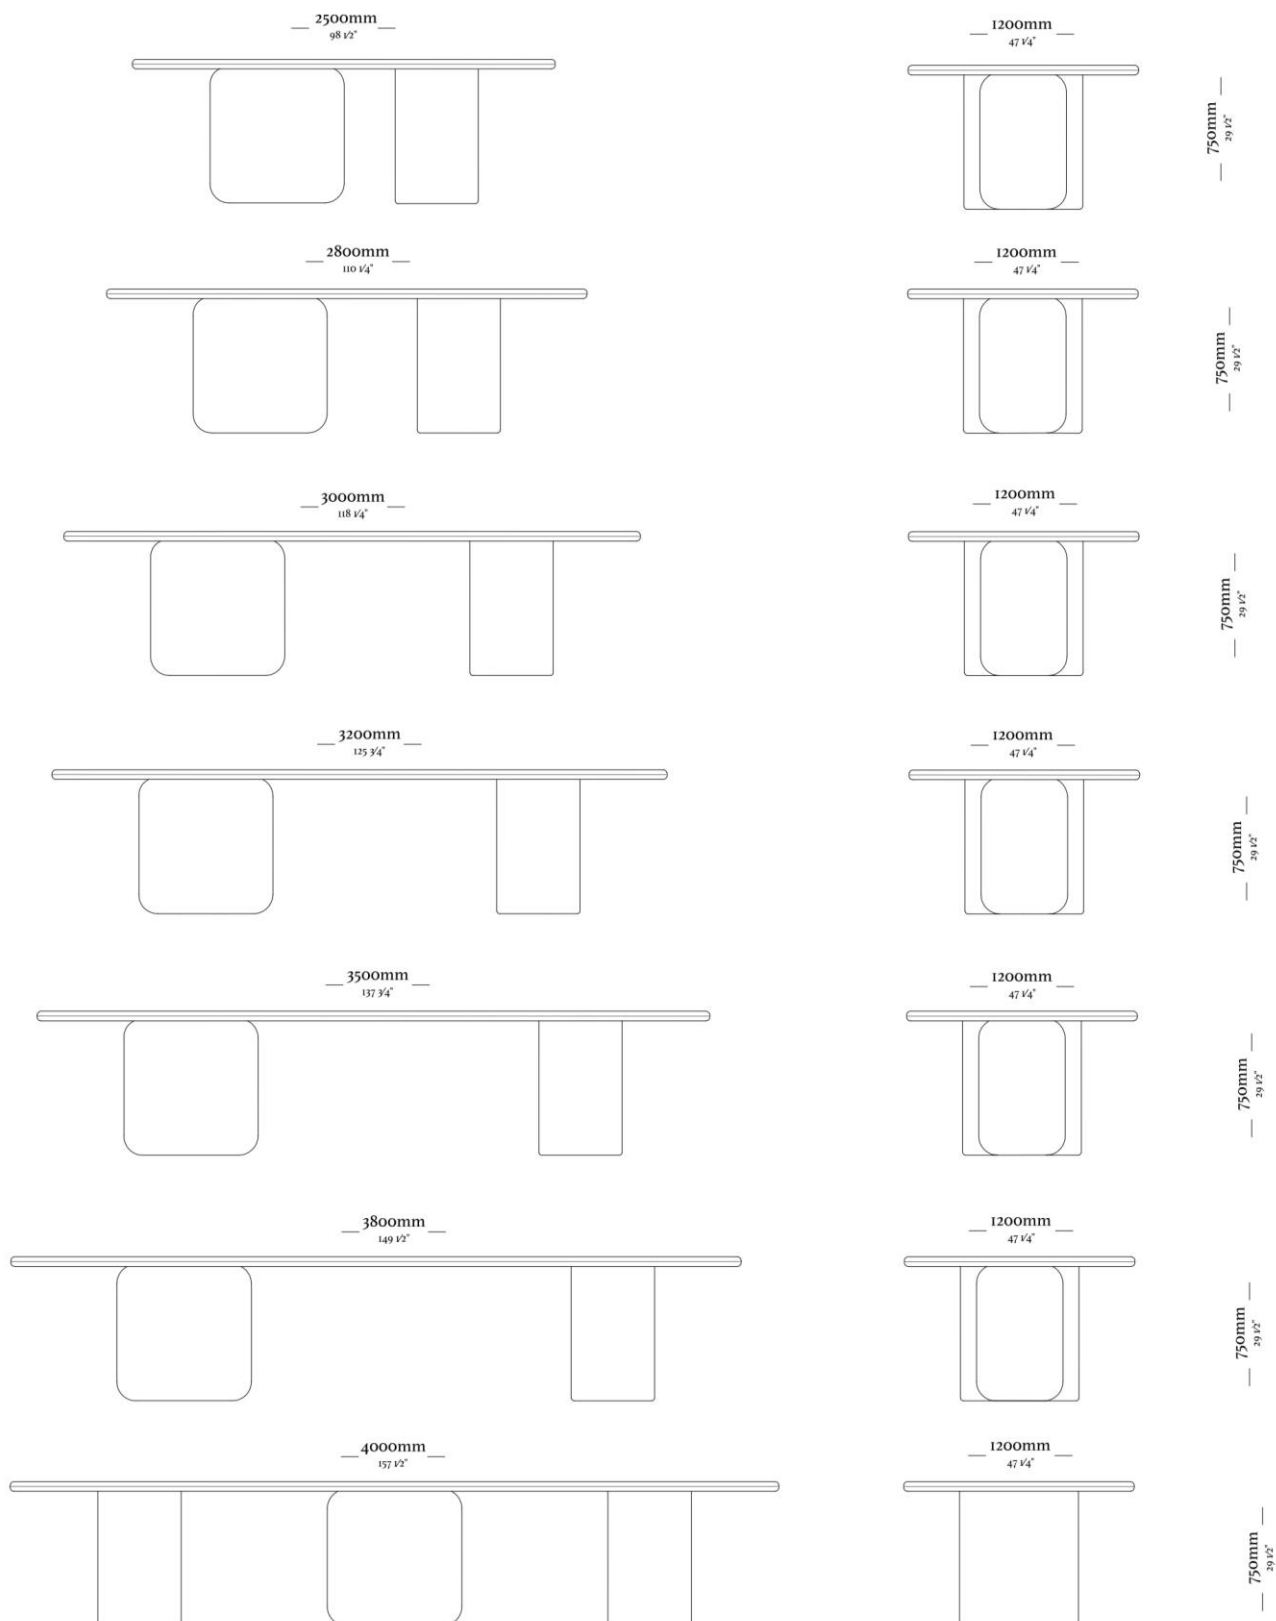

The Cacau table is structurally composed of a high quality MDF base machined to print organic lines. The top is made of MDF in laminated wood, with details in rectangular cutouts. Composition that guarantees ergonomics and visual identity for the piece.

FINISHES/COATING

Finishes and coating available according to the price list. There is a wide variety of finishes and coating available to create unique pieces.
